San salvador solar energy policy

1075KWHH ESS

Overview

The Law for the Promotion of the Use of Renewable Energy, approved by the Legislative Assembly in October 2025, establishes benefits aimed at generating renewable energy for self-consumption, as well as energy storage systems, their installation, operation, and maintenance. El Salvador is poised to lead the region in solar energy by 2025, thanks to a significant increase in solar-powered plants and a decisive shift toward renewable energy sources. This move underscores the country's commitment to sustainability and reducing its carbon footprint. These efforts have helped reduce dependence on fossil fuels and decrease the carbon footprint, thereby contributing to mitigating. Through various policies drafted and passed over the past three decades, El Salvador has set itself on a path towards clean energy – a necessity for a country that is severely at-risk of climate change and its effects.
