Several lights on the photovoltaic panel are flashing

Overview

Flashing often signals that your solar light isn't receiving sufficient power. This issue can stem from weak or depleted rechargeable batteries, dusty or obstructed solar panels, or even loose wiring inside the unit. That is why it is important to know the correct position, especially if you live in the southern hemisphere. If your lights are in a. Whether caused by insufficient battery capacity, faulty wiring, or incorrect sensor settings, inconsistent lighting can undermine the intended ambiance and functionality.
