

PIENAAR ENERGY (PTY) LTD

Shuiye Solar Photovoltaic Power Generation

Overview

This project is China General Nuclear Power Corporation's first centralized solar energy system project in Shanghai, with an installed capacity of 158 MW. It will be implemented in two phases. Solar panels, also called PV panels, are combined into arrays generation from solar energy. Spanning across. By combining the design, construction and operation technology of solar power plants with the global project development and equipment manufacturing capabilities, and adopting the world-leading tower (CT) and trough (PT) concentrating and heat storage technologies, Shanghai Electric Power. Solar photovoltaics (PV) is a very modular technology that can be manufactured in large plants, which creates economies of scale, but can also be deployed in very small quantities at a time. We specialize in wind power generation systems, photovoltaic power generation systems, wind-solar hybrid power generation systems, battery energy storage. etc, further producing clean and environmentally friendly electricity.

Shuiye Solar Photovoltaic Power Generation

Shanghai's largest photovoltaic project is fully connected to the grid

This project is China General Nuclear Power Corporation's first centralized solar energy system project in Shanghai, with an installed capacity of 158 MW. It will be implemented in two phases.

Who is responsible for Shuiye photovoltaic panels

Photovoltaic panels, or solar panels, are the most crucial component of a solar power system. They are responsible for converting sunlight into direct current (DC) electricity
