Singapore energy transition

Singapore energy transition

What could Singapore's energy mix look like in 2035?

To reach its net zero target by 2050, Singapore is looking to rely on more clean energy sources and reduce natural gas in its energy mix by 2035.

Home Energy Storage (Stackle system)

- 
High Efficiency
- 
Easy installation
- 
Safe and Reliable
- 
Perfect Compatibility

Product Introduction

-  Scalable from 10kWh to 50 kWh
-  Self-Consumption Optimization
-  Integrable with inverter to avoid the compatibility problem
-  LFP battery, safest and long cycle life
-  Stackside design, effortless installation
-  Capable of High-Powered Emergency-Backup and Off-Grid Function

Energy 2050 Committee Report

The Energy Market Authority (EMA) has laid out an energy transition blueprint to decarbonise Singapore's energy supply based on having "four switches" of natural gas, solar, ...
