The opportunity of smart grid analytics

Smart GenerationStorm PredictionGrid AnalyticsRevenue ProtectionConsumption AnalyticsCustomer Research and AnalyticsTechnicians can't be everywhere in a service territory, so analytics needs to be their eyes in the field. For example, in the past a technician might read gauges at remote equipment once a month. But a serious condition, such as a methane buildup in a transformer, needs to be addressed now. Today, sensors pull in real-time data for immediate identi See more on sas
