

PIENAAR ENERGY (PTY) LTD

Solar Photovoltaic Panel Drain

Overview

Implementing rainwater management systems enhances panel cleanliness, maximizing energy output. Research shows that proper drainage can improve solar efficiency by up to 20%. In most c-Si-based solar panels, the metal frame plays an important role by providing structural support, protecting against moisture, facilitating heat dissipation, and ensuring easy installation with mounting system, among others. These clips ensure that rainwater, dew, and condensation do not remain on the solar panels or their frames, protecting the entire photovoltaic (PV) system from moisture damage and performance loss.

Solar Photovoltaic Panel Drain

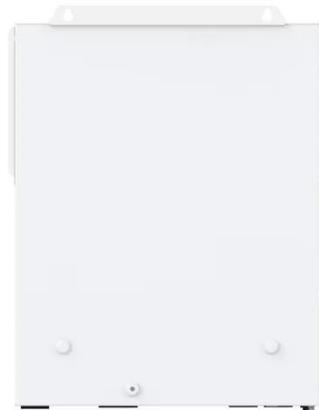

Water drainage clips for pv of the PV panel frame work

The solar panel water drain clips is installed at the frame of the PV panel and is designed with a specific inclination and flow channel, which can effectively guide the water to be discharged along the set ...
