# **Solar and energy storage in Hungary**

## Overview

---

Hungary has unveiled a significant new initiative to boost residential energy storage, allocating HUF 100 billion to subsidize home battery systems. The program is designed to help households with existing or planned solar panels become more energy independent by storing. Hungary has officially announced a large-scale residential battery energy storage subsidy program, signaling a major acceleration of energy storage deployment across Central and Eastern Europe. Author: Centre for Alternative Technology. Electrification and reindustrialisation are driving a sustained increase in Hungary's electricity demand.
