

**PIENAAR ENERGY (PTY) LTD**

**Solar generator not lighting up**

## Overview

---

Most solar light failures are caused by dirty panels, dead batteries, or water damage. For persistent issues, reset sensors or check wiring connections. Whether you are using a rooftop solar system, a portable power station, or a solar generator, understanding the causes of power loss is essential for proper maintenance. When solar panels don't receive enough sunlight, they cannot generate enough electricity to power the generator, which can be a significant. We have a Bluetti AC500 with two 300B batteries (total 6000w) connected via NEMA 14-50 inlet box installed to a 50amp breaker in a 200amp service panel with a generator interlock kit. Whether you're a solar newbie or a DIY pro, this article has you. To restore functionality to a solar panel that shows no signs of illumination, one must follow several systematic steps, ensuring a thorough examination of possible issues. Check the charge controller, 4. Let's look at the potential symptoms and possible solutions of each solar panel issue.
