

PIENAAR ENERGY (PTY) LTD

Solar inverter identification sign

Overview

Most modern inverters feature three key sections: LED indicators, digital readouts, and status icons. LED Indicator Lights Solid: Powered by the grid (ideal for nighttime). Flashing: Running on battery/solar (check battery if flashing persists >24 hours). Users can read this. The solar inverter display refers to an LCD screen on the device body. The power flow indicator, resembling a sun with rays, indicates whether the system is producing current power output, total energy production, and any system errors or issues.
