Solar panel companies go bankrupt

Overview

Some major players in the solar power industry (Sunnova, Mosaic, etc.) residential and finance sectors, have filed for Chapter 11 bankruptcy protection or announced major closures in 2025. The solar industry experienced exponential growth over the last decade as costs fell and favorable policies helped drive mass adoption. However, 2024 has brought immense challenges, with higher interest rates, tighter financing, and adverse policy shifts in key states contributing to over 100 solar. At the same time, between 2022 and 2025, a wave of bankruptcies and solar companies going out of business occurred in the United States. The solar industry was heavily affected by a range of factors, like higher interest rates, legislative shifts, competition, and financing issues. Some companies. According to our internal data, more than 100 solar companies have shut their doors this year alone—a level of contraction we haven't seen in nearly two decades. So why are solar companies going out of business in what should be a boom market?

A.
