# Solar panel pn unit size

## Overview

---

The standard residential solar photovoltaic panel size you'll see most often is based on a 60-cell configuration, typically measuring about 67 inches long by 40 inches wide. This size offers the best balance between power output, handling ease, and fitting standard roof dimensions. A 400W panel has the same physical footprint whether it produces 350W or 450W - the difference lies in cell. There are 3 standardized sizes of solar panels, namely: 60-cell solar panels size. That's basically a 66×39 solar panel. But what is the wattage?

That is unfortunately not listed at all. Each commercial panel could generate 400W - 600W or more, depending on the type of panel and its efficiency. The insights that follow weigh the gains and compromises of large versus compact panels, helping you choose a size that truly fits - Solar panel size is the key metric of every installation.
