Solar panel production in Macedonia

Overview

A pivotal moment occurred in 2020 with the launch of the first significant solar plant, and by 2023, North Macedonia had experienced a 251% increase in solar capacity, demonstrating the effectiveness of government initiatives in fostering growth in the sector. Gain comprehensive insights into the statistics and metrics surrounding the solar production industry in North Macedonia. On average, North Macedonia has 2,400 to 2,600 hours of sunshine annually. 1 The average annual electricity generation per installed kWp (kilowatt-peak) of solar PV in North Macedonia is rapidly evolving, fueled by significant regulatory reforms and an increasing commitment to renewable energy. Following the implementation of the first renewable energy law in 2021, the nation has seen a remarkable surge in investor interest. At Energy Week Western Balkans, the start of production is scheduled for March. North Macedonia-based PiKCELL Group announced on Facebook that it would build a factory for the production of solar panels. By the end of 2022, the country had reached a photovoltaic capacity of approximately 144 MW, with projections indicating rapid growth in the coming years.
