

PIENAAR ENERGY (PTY) LTD

Solar panel sorting

Overview

Panel sorting and binning is the quality control process that separates solar panels into performance categories. Every panel that leaves a factory goes through this evaluation. Panels undergo. Sorting machines can be programmed to recognize the different specifications of each module and sort them accordingly. Discover more Horad, as a specialist manufacturer of intelligent PV panel production line, is committed to providing complete PV module manufacturing solutions for global. The ECOPACK R is designed to revolutionize solar module handling with its fully automatic packing system. Featuring a 6-axis robot and up to six pallets for detailed sorting based on module power class, this system efficiently manages the placement of solar modules into designated pallets after. Clients in the solar manufacturing sector prioritize quality and precision in their production processes. This precision is crucial. As a critical terminal equipment in cell production lines, the solar cell sorting system undertakes the vital task of precise measurement, performance grading, and visual inspection for each cell, serving as the meticulous "quality gatekeeper" that ensures module power consistency and high-quality.

Solar panel sorting

Sorting & Packaging Machines , Solar Panel Making Machine , Horad

Our portfolio includes not only automatic solar panel production lines, but also individual equipment for PV modules production, from glass loading equipment at the beginning to solar panel assembly and ...
