

**PIENAAR ENERGY (PTY) LTD**

# **Solar photovoltaic power generation tracking system**

LIQUID/AIR COOLING

ON GRID/HYBRID

PROTECTION IP54/IP55

BATTERY /6000 CYCLES

## Overview

---

Solar tracking systems are mechanical structures that often include motorized components. Their main goal is to maximize energy capture from solar panels throughout the day. This is done by mounting photovoltaic (PV) modules on a structure that can rotate accurately to follow the. These trackers are commonly used for positioning solar panels to maximize sunlight exposure. Components of a solar. Solar power is highly scattered, and it needs to be focused and tracked to generate a meaningful amount of energy.
