

**PIENAAR ENERGY (PTY) LTD**

# **Solar power generation for home use in Victoria**

## Overview

---

All-electric homes, powered by solar, can save you thousands on energy bills every year. Find out everything you need to know about making the switch. Solar panel rebates plus the option of an interest-free loan are available for eligible Victorian homes. Data from Australia's Clean Energy Regulator indicates more than 848,894 systems (small-scale <100kW) had been installed in VIC by the beginning of December 2025. A device called an inverter is used to convert this DC electricity into the 240-volt AC (alternating current) electricity which is required to run the electrical. Solar panels, also called solar photovoltaic (PV) systems, use sunlight to generate renewable electricity. It can be a small number of solar. If you have surplus solar electricity because you're using less than your solar system is generating, this is sold back to the grid and called exported energy.
