

PIENAAR ENERGY (PTY) LTD

Solar power generation for people with disabilities

Overview

Mobile renewable nanogrids offer off-grid power solutions that can help maintain access to medical equipment, communication tools, and safe shelter. Inclusive emergency management must consider disability at every stage, from public messaging to transportation, sheltering. During climate disasters and extreme weather events, people with underlying health conditions and disabilities face global mortality rates that are four times higher than those without disabilities. Add us as a Google Preferred Source to see more of our articles in your search results. This audio. Power outages are inconvenient for everyone, but for the disability community, they can be a matter of life or death. For people who rely on electricity-dependent medical equipment, generators are crucial for maintaining life support, mobility and overall well-being during power outages. Fortunately, solutions like energy storage and clean. Efficiency for Access is a global coalition working to promote high performing appliances that enable access to clean energy for the world's poorest people.
