

PIENAAR ENERGY (PTY) LTD

Solar power generation scam in rural areas

Overview

While there are some government-funded solar programs for households that qualify, “going solar” isn't free. Honest businesses will tell you exactly how much it'll cost to get and install solar panels. The scams vary, but here's the gist: someone claiming to be with the government or your utility company promises big savings on your utility bills from solar energy. Solar energy has become a target for scammers. If it sounds too good to be true, it probably is. Solar energy popularity continues to rise in Northeast Kansas, and scammers follow the potential for sales and look for ways to take advantage of unassuming folks. People complain that they were deceived about costs and savings, misled about. Here are some of our recommendations for avoiding solar scams: The saying "there's no such thing as a free lunch" applies when shopping for solar. 5-megawatt solar installation at the Sierra Army Depot in Herlong provides community solar for co-op members. Photo by Dean Bryant of Berry Construction By Pam Stevens As the popularity of residential solar power grows, so does the number of scams targeting homeowners eager to. Implementing solar home systems, mini-grids, solar-powered water pumps, and street lights can help overcome challenges of energy access in rural areas. Technical, financial, and awareness challenges need to be Rooftop photovoltaic (PV) power generation is an important form of solar energy.
