

PIENAAR ENERGY (PTY) LTD

Solar power generation with solar panels in Niger

Overview

Niger receives some of the highest solar irradiation levels in the world, with vast open land, minimal cloud cover, and consistent sun year-round. This makes Niger extremely favorable for standalone systems, solar mini-grids, battery-backed hybrid systems, and large-scale desert. The Niger Solar Electricity Access Project (NESAP), aimed at enhancing electricity access in rural and peri-urban areas of Niger through solar energy, started in 2017 and has built 15 solar power plants. This project, funded by the World Bank through the International Development Association (IDA). Niger is taking significant strides to address its energy challenges, as new solar projects begin to transform the landscapes of Niamey and Zinder. The African Energy Chamber (AEC) (www.aec.org) lauds the recent inking between Savannah Energy Niger Solar Limited, a subsidiary of British independent energy company Savannah Energy, and the Government of Niger on the development of two solar photovoltaic power plants with a combined. With vast solar exposure, minimal rainfall, and low grid penetration, Niger presents one of the most promising environments in Africa for solar energy deployment, especially for off-grid and community-level systems. Solar resource map copyright at 2021 Solargis. Licensed under the Creative Commons. Access to renewable energy will be increased and electrification scaled up in Niger thanks to a US\$25 million loan from the OPEC Fund for International Development in support of the Niger Solar Plant Development and Electricity Access Improvement Project (RANAA). The OPEC Fund is joining forces.

PRODUCT INFORMATION

-  **BATTERY CAPACITY**
50kWh-500kWh
-  **DC VOLTAGE RANGE**
400V-1000V
-  **DEGREE OF PROTECTION**
IP54
-  **OPERATING TEMPERATURE RANGE**
-10-50°C

Niger's Solar Expansion: Paving the Path to Energy Independence

Discover how Niger is tackling energy shortages with new solar projects in Niamey and Zinder, aiming to reduce import reliance and achieve energy self-sufficiency.
