

**PIENAAR ENERGY (PTY) LTD**

# **Solar power station trends**

## Overview

---

In this analysis, we examine the latest trends in installations, costs, and market dynamics, providing solar businesses, developers, and investors with a comprehensive picture of where the market is headed. The solar industry is on track for its biggest year ever. IEA PVPS has released its latest Trends in Photovoltaic Applications 2025 report, revealing that the world's cumulative installed PV capacity surpassed 2 260 GW by the end of 2024, marking a 29% year-on-year increase. According to the report, 2024 was another record year for solar PV, with between. The solar industry is poised for a transformative year in 2026, characterized by significant policy shifts, accelerated energy storage integration, and solar's growing role as a hedge against energy price volatility 1 7. 3 GW of solar module manufacturing capacity. The demand for solar power is rising quickly across the globe, driven by: Falling Costs of Solar Panels - Over the past decade, the cost of solar photovoltaic (PV) panels has dropped by over 80%, making solar power one of the most cost-effective energy sources. By 2025, further cost reductions are. Electricity generation by the U. electric power sector totaled about 4,260 billion kilowatthours (BkWh) in 2025. In our latest Short-Term Energy Outlook (STEO), we expect U. solar market in 2025 is characterized by record installation growth coupled with significant market headwinds and shifts. As of September 2025, deployment numbers are soaring to new highs, yet industry players also face challenges like policy uncertainty, financing hurdles, and supply.
