

PIENAAR ENERGY (PTY) LTD

Solar support grounding installation specifications

Overview

Solar electric contractors must electrically ground the structure to a single premises ground. 47(C)(3). GPR devices (e., US Radar, GSSI) can provide detailed information about private utilities, shallow and deep obstructions, as well as accurate tracing of utility lines, water lines, fiber optics, telephone lines and more. GPR can provide up to 1 cm of accuracy although 5 cm is common with the. allation by Solar Foundations USA®, Inc. The project drawings are unique to each job site and are based on client specified t may supersede this installation manual. If you need assistance at any point in your installation or have suggestions on how we can improve your experience, call customer support at 1-800-819-7236 sary standards required for product reliability. All installers must thoroughly read this. The Tamarack Solar Ground Mount system is a visually appealing photovoltaic (PV) module installation system that significantly lowers PV module installation cost by allowing the installation professional to stock fewer parts and to complete the installation in less time.
