

PIENAAR ENERGY (PTY) LTD

Somaliland utility-scale solar

Overview

Solar Energy: High solar irradiation levels averaging 5.0 kWh/m²/day make Somaliland ideal for photovoltaic (PV) development at both utility and distributed scales. The Republic of Somaliland is strategically located in the Horn of Africa, bordering the Gulf of Aden and lying close to the Bab al-Mandeb Strait, one of the world's most critical maritime trade routes.

Wind Energy: Wind speeds in parts of Somaliland, especially in coastal and elevated areas, are favorable for wind turbines, with potential generation capacity exceeding 400 MW in targeted regions. Harnessing abundant solar and wind resources to transition from high-cost diesel to sustainable, affordable energy for all. The project, intended for Awdal Electric, electricity produced to the grid. These facilities are at heights not seen before. With over 7GWp submitted to date this project advantages and challenges. A comprehensive in grid-scale installations. We know all after Decem.
