# Spain s new 240-watt solar panels

## Overview

---

SUNO® UL is the first ultra-light and flexible solar panel with similar characteristics to conventional panels. Its technology allows installation on any surface and without support structure. Suitable for fibre cement, tile and lightweight roofs (TPO and PVC). Reduces installation. Legacy Technology with Niche Applications: While 240W panels are considered legacy technology in 2025's market dominated by 400W+ panels, they remain highly relevant for RV installations, off-grid cabins, and space-constrained residential projects where their manageable size (65" x 39") provides. The rise of solar panels is transforming the Spanish energy landscape., positioning photovoltaic energy as a key element in reducing electricity bills, advancing sustainability, and strengthening energy independence. In recent years, The rate of installation of solar panels has not stopped growing. Photovoltaic cells have been the building blocks of a solar power boom spurred by Prime Minister Pedro Sánchez, whose support for renewables, combined with Spain's abundant sunshine, has driven a wave of construction. In just a few months, Spain has green lit more than 65 GW of solar projects. Primroot. com is a leading-edge professional solar panels & inverter manufacturer based in the high-tech hub of Shenzhen, China. Fueled by the creative spirit and expertise of our world-class research and development team, we are at the forefront of the Photovoltaic (PV) and inverter industry.

Spain is one of the first countries to deploy large-scale solar photovoltaics, and is the world leader in concentrated solar power (CSP) production. Spain is also one of the European countries with the most hours of sunshine. In 2022, the cumulative total solar power installed was 19.5 GW, of which 17.2 GW were solar PV installations and 2.3 GW were concentrated solar power. In the same year, solar power accounted for 11....
