

PIENAAR ENERGY (PTY) LTD

Specialized in the production of various lithium battery packs

Overview

Custom lithium-ion battery design and manufacturing for industrial, commercial, and specialty markets. A battery pack is an assembly of individual battery cells configured in series, parallel, or a combination of both, to deliver a specific voltage and current for a particular application. These systems are more than just a collection of cells; they typically include a battery management system. A battery pack of various voltages and capacities can be made by connecting different numbers of cells in different ways. We help OEMs transition from overseas production to domestic. Our team has extensive experience with lithium-ion, lithium polymer, nickel metal hydride, nickel cadmium, lithium primary, and alkaline battery packs and assemblies. On all projects, we work closely with customers from the first design concept through prototyping and testing to large-scale.

Specialized in the production of various lithium battery packs

Custom Lithium Battery Pack Manufacturer & Design , Holo Battery

As a certified OEM/ODM battery pack specialist since 2007, we transform your complex power challenges into reliable, market-ready battery solutions. With over 6,000 successful projects, we ...
