

PIENAAR ENERGY (PTY) LTD

Specifications and dimensions of East Asia solar water pumps

12.8V 100Ah

Overview

The technical basis for this guidance document is the International Electrotechnical Commission (IEC) International Standard 62253, Photovoltaic pumping systems – Design qualification and performance measurements. These product. The development of this guideline was funded through the Sustainable Energy Industry Development Project (SEIDP). The World Bank through Scaling Up Renewable Energy for Low-Income Countries (SREP) and the Small Island Developing States (SIDSDOCK) provided funding to the PPA as the Project. nver nver nver nver vert vert vert vert vert vert . ater Pumping System set uses the irradiance available through SPV array. The SPV array produces DC power, whi e at-least equal to Solar Panels Power Capacity (Wp), not Pump Capacity. Hundreds of solar photovoltaic pumps have been built and operated in countries of Asia and the Pacific. 100 L/H up to 3600 L/H. Available for high temp applications up to 100^o C for use in cooling and circulation systems. Car Cooling Systems Voltage: 4.

Specifications and dimensions of East Asia solar water pumps

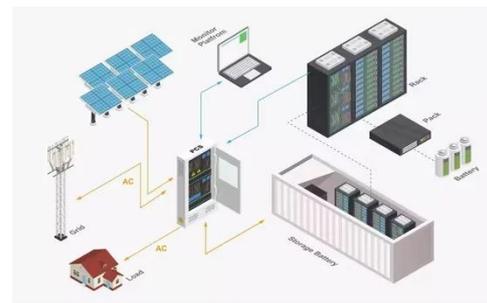

Solar DC Brushless Water Pumps

Solar DC Brushless Water Pumps 100 L/H up to 3600 L/H. Long life, low voltage, completely submersible and in line use. Available for high temp applications up to 100° C for use in cooling and ...

Design Selection and Installation of Solar water Pumping Systems

Determine the water source and, based on the characteristics of the water source and the water's end usage, select the appropriate solar water pumping system to be installed.
