

**PIENAAR ENERGY (PTY) LTD**

# **St Lucia Metro Station Energy Storage Container Grid- connected Type**

## Overview

---

Backed by St Lucia Electricity Services (LUCELEC), the initiative will be developed on a 70-acre site on the island's southwest coast. Once complete, the system will connect to LUCELEC's 66 kV transmission grid, reinforcing local grid stability while increasing renewable energy. In a significant move toward energy independence and climate resilience, Saint Lucia is preparing to launch its second industrial-scale solar project—a 10 MW photovoltaic installation paired with a 26 MWh lithium-ion battery energy storage system (BESS). The project, set to be tendered later this year, is featured in St. Lucia's Energy Report Card (ERC) for 2021. A started construction on its first commercial-scale project. Construction work will include the development of 10 MW of solar power along with an energy storage system with two-hour lithium-ion batteries with a capacity of approximately 13 MW / 26 MWh, as well as connection to LUCELEC's 66 kV transmission grid. North America leads with 40% market. This NEM Interconnection Handbook specifies the typical minimum technical requirements to interconnect generating facilities with SCE's electric system under the Net Energy Metering (NEM) program. Lucia Author: Victoria Healey, Laura Beshilas, Kamyria Coney, and Gary Jackson Subject: This profile provides a snapshot of the electricity capacity and generation profile of Saint Lucia, one of six Caribbean countries that make up the Windward Islands - the southern.
