Startup method of independent microgrid

Overview

An embodiment of the present invention is a startup method for a microgrid that is constituted of a plurality of inverter power supplies, which perform independent load distribution, and in which the inverter power supplies are divided into a master that is started up. An embodiment of the present invention is a startup method for a microgrid that is constituted of a plurality of inverter power supplies, which perform independent load distribution, and in which the inverter power supplies are divided into a master that is started up. Priority date (The priority date is an assumption and is not a legal conclusion. Google has not performed a legal analysis and makes no representation as to the accuracy of the date listed.) Provided are a microgrid startup method and startup program with which it is possible to suppress frequency. A startup method and startup program for microgrid that enable to stably start up the microgrid without producing frequency fluctuation is provided. Coalition stakeholders include the City of Oakridge, South Willamette Solutions, Lane County, Oakridge Westfir Area Chamber of Commerce, Good Company/Parametrix, Oakridge Trails.

Startup method of independent microgrid

A new starting capability assessment method for induction motors in ...

To ensure the stable operation of an industrial islanded microgrid after IM is put into operation, a new starting capability assessment method for IM is proposed in this paper.
