

PIENAAR ENERGY (PTY) LTD

Stockholm off-grid solar

Overview

Discover how Stockholm's cutting-edge off-grid inverter technology empowers homes and businesses to break free from traditional energy constraints. With 93% efficiency rates and 72-hour battery backup capabilities, this innovation reshapes renewable energy utilization. Arholma is one of the most beautiful islands in the Stockholm Archipelago. This 2025 guide reveals how bifacial panels, 24kWh batteries, and Sweden's sneaky solar subsidies turn Arctic darkness into a cozy, Netflix-binging. Sweden's Ports of Stockholm and its partners have decided to launch a project that combines onshore power supply (OPS) and microgrid technology. The project, called “Innovative Microgrid Design for Sustainable Onshore Power Supply: Port of Stockholm case study”, runs between 2024 and 2027. The system can then deliver electricity 24/7 at any place and no need for infrastructure like transmission and distribution lines.

Stockholm off-grid solar

Icke-nätanslutet

From the smallest hut to the largest resorts, our off-grid systems start from 500W and can virtually provide unlimited power through parallel operation. Three or split phase operations are also possible.
