

**PIENAAR ENERGY (PTY) LTD**

# **Strong wind blows away photovoltaic panels**

## Overview

---

Yes, solar panels can be blown off a roof under extreme wind conditions or when a system is improperly installed. The most common failure path is the mounting hardware loosening or failing before the panels themselves detach. How High Is Too High?

What About Debris?

What Should You Do Before High Winds Or A Hurricane?

Can Heavy Winds Blow Solar Panels Off Your Roof?

How Can We Protect Solar. High winds are more likely to damage solar panels due to debris and objects hitting the panels during a storm or particularly windy period. Homeowners need to work with an installation company registered with the MCS to ensure installation is being done correctly, which is the best means of. Installation Quality: Panels must be securely mounted with appropriate hardware designed to withstand wind loads. Roof Type: Different roofing materials (e. Investing in professional.
