

## PIENAAR ENERGY (PTY) LTD

# The cost of energy storage per watt for photovoltaic projects

**100-430KWH**

**230|400V**

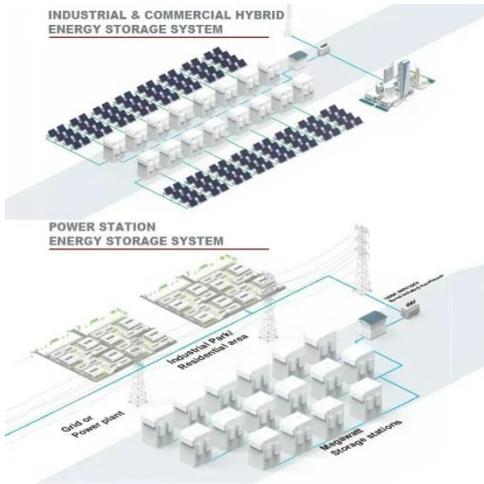

## Overview

---

As of 2025, prices range from \$0.86 per watt-hour (Wh) for utility-scale projects, while residential systems hover around \$1,000–\$1,500 per kWh [4] [6] [9]. But wait—why the wild variation?

Let's dive deeper. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U.S. solar photovoltaic (PV) systems to develop cost benchmarks. These benchmarks help measure progress toward goals for reducing solar electricity costs. The National Renewable Energy Laboratory (NREL) publishes benchmark reports that disaggregate photovoltaic (PV) and energy storage (battery) system installation costs to inform SETO's R&D investment decisions. This year, we introduce a new PV and storage cost modeling approach. Cumulative solar capacity is measured in megawatts. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) – Learn more about this data  
Note: Costs.

## The cost of energy storage per watt for photovoltaic projects

### U.S. Solar Photovoltaic System and Energy Storage Cost

This year, we introduce a new PV and storage cost modeling approach. The PV System Cost Model (PVSCM) was developed by SETO and NREL to make the cost benchmarks simpler and more ...

### How much does a photovoltaic energy storage project cost?

Numerous elements contribute to installation costs in photovoltaic energy storage projects. Labor costs, installation intricacies, and the need for local permitting can all affect pricing.
