

## PIENAAR ENERGY (PTY) LTD

**The lithium iron phosphate  
battery station cabinet has the  
largest capacity**

## Overview

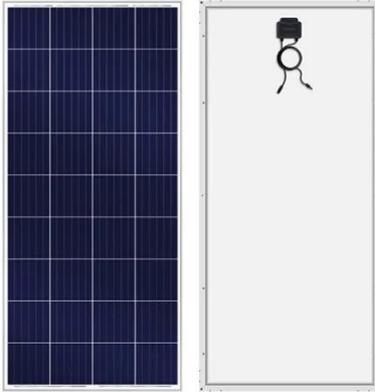

---

04 MWh lithium iron phosphate battery pack carried by a 20-foot prefabricated container with dimensions of 6058 mm x 2438 mm x 2896 mm. Each energy storage unit has a capacity of 1044. The battery. Multiple lithium iron phosphate modules wired in series and parallel to create a 2800 Ah 52 V battery module. Note the large, solid tinned copper busbar connecting the modules. 1 billion in 2024, demonstrating robust momentum across key application sectors. The market is expected to grow at a CAGR of 15. 4% from 2025 to 2033, propelling the total market value to. What is Lithuania's largest battery storage facility?

This project will become Lithuania's largest battery storage facility that is privately owned, boosting the country's total storage capacity by approximately 50%. Distinct from other lithium-ion batteries, it offers significant advantages like longer lifespans, better thermal stability, and increased safety.
