

PIENAAR ENERGY (PTY) LTD

The power box of the mobile company downstairs

Overview

The exterior breaker box for a mobile home, formally known as the service equipment or service pedestal, is the central electrical interface between the utility power grid and the manufactured home structure. Experiencing power outages in just one room can be quite baffling, especially when the circuit breaker remains in the “on” position. Well usually when "half" of something dies in residential electrical, it means one hot leg is down. Unlike traditional site-built houses, regulatory requirements mandate this equipment be. The mobile home electrical panel consists of multiple circuit breakers that are responsible for preventing overloads, which could accidentally cause electrical fires. It is important to remember that. When a light goes out in your home, it's easy to follow a simple troubleshooting routine: check the light switch, inspect the bulb, and take a look at your circuit breaker.
