The price increase game of photovoltaic panels

Overview

Wood Mackenzie's October 2025 analysis confirms that PV module prices are jumping approximately 9% in Q4 2025, with further increases expected through 2026. It represents a structural market correction that will reshape solar procurement strategies. Somewhere in the tumult of the global economy in recent months, solar panel prices hit bottom and then began to rise. In a new weekly update for pv magazine, OPIS, a Dow Jones company, provides a quick look at the main price trends in the global PV industry. : The spot price assessment for TOPCon over 600 W modules DDP US remained at \$0. Looking ahead, the numbers are likely to continue to rise. But just because they are going up doesn't mean panels are. Wood Mackenzie reports a 9% solar price surge in Q4 2025. China's VAT rebate reduction, polysilicon consolidation, and lower factory utilization are reshaping the market. To protect margins, lock in pricing early, diversify suppliers, and adopt high-efficiency HPBC and ABC modules. Smart. US solar module prices rose in December 2024 for the first time since last summer, driven by tariff adjustments and patent litigation uncertainty, according to Anza. According to industry analysts, we can.
