

## PIENAAR ENERGY (PTY) LTD

# The yellow line standard under the photovoltaic panel

## Overview

---

The National Electrical Code (NEC) Section 690 outlines specific labeling requirements for photovoltaic (PV) systems to ensure safety and compliance. These requirements were updated in 2020. Each PV panel (sometimes called a module). The point is greater than the total areas in yellow. Mounting solar panels on a roof is a crucial step in installing a solar. The NEC690 Building Inspector's Guide is a set of reference materials developed for Building Inspectors and AHJ Officials as it relates to Article 690, of the National Electrical Code (NEC 2014) for Photovoltaic Warning Labels. However, these guidelines are not necessarily organized in an easy to use manner and make it difficult for system installers to get a clear picture of what is required labeling for PV systems. The purpose of. The sections that follow break down what those hazards look like on site and how the right labels make them impossible to miss. Did you know that improperly marked photovoltaic panels can reduce energy output.
