

PIENAAR ENERGY (PTY) LTD

Togo electric vehicle infrastructure

Overview

This electric vehicle project aligns with the President's vision of an industrialized Togo—one that trains its own engineers, technicians, and operators locally, while prioritizing environmental protection and carbon emission reduction. (Togo First) - Togo's national electric mobility strategy, launched in 2025, has entered a new phase of implementation. The Ministry of Environment and the Golfe 3 municipality took delivery of electric vehicles in Lomé on Thursday, Jan. 22, 2026, with support from the United Nations Development. In a global context of energy transition and technological revolution, Togo—under the visionary leadership of President Faure Essozimna Gnassingbé—continues to lay the foundations for sustainable and inclusive development. The latest initiative comes from the University of Lomé, which is making. Africa's journey towards sustainable transportation has taken a significant leap forward with the development of new electric vehicle (EV) manufacturing plants in Benin and Togo.
