

PIENAAR ENERGY (PTY) LTD

Tool battery production equipment

Overview

Battery manufacturing equipment refers to the machines and systems used for battery production, fabrication, assembly, and testing. This complex process may require the use of coating systems, bonding and sealing solutions, adhesive dispensers, slot dies, battery. Nordson is globally renowned for providing high-quality and innovative battery manufacturing equipment, including 2K dispensing systems, bulk unloaders, slot dies, die lip adjustment systems, x-ray machines, battery pack sealing machines and more. Our precision technology is designed and developed. Founded in 2018 in the UK, Anaphite specializes in advanced battery electrodes using its proprietary dry coating (DCP®) technology. The core competencies include solutions and equipment for extrusion, SZ-stranding, and corrugation for the production of low-voltage (LV), medium-voltage (MV), and high-voltage (HV) cables, automotive cables. Advanced handling solutions ranging from raw material conveying to later process steps like stacking, final unit assembly, and beyond, are all parts of Piab's advanced offering for battery and fuel cell manufacturing.

Tool battery production equipment

Battery Manufacturing , Bosch Manufacturing Solutions , BMG

With over 15 years of experience in battery manufacturing, we have established ourselves as experts in battery assembly solutions, especially module and pack. In our portfolio you will find solutions for all ...
