

PIENAAR ENERGY (PTY) LTD

Total annual solar photovoltaic power generation

Overview

Global solar photovoltaic capacity has grown from around 40 gigawatts in 2010 to approximately 2. Only in that last year, installations increased by almost 40 percent. Ember (2026); Energy Institute - Statistical Review of World Energy (2025) - with major processing by Our World in Data This dataset contains yearly electricity generation, capacity, emissions, imports and demand data for European countries. In our latest Short-Term Energy Outlook (STEO), we expect U. 6% in 2027, when it reaches an annual total of 4,423 BkWh. The. Solar photovoltaics (PV) is a very modular technology that can be manufactured in large plants, which creates economies of scale, but can also be deployed in very small quantities at a time. This allows for a wide range of applications, from small residential roof-top systems up to utility-scale.

Total annual solar photovoltaic power generation

Global solar generation up 31% year-on-year

The world generated 2,109.76TWh of electricity from solar in the first nine months of the year, a 31% increase over the same period in 2025.
