Electricity in Ukraine

Overview History Generation Imports, storage, transmission and distribution Power system reforms Economics

Electricity is an important part of energy in Ukraine. Most electricity generation is nuclear, and the system is inflexible. The bulk of Energoatom output is sold to the government's "guaranteed buyer" to keep prices more stable for domestic customers. Until the 2010s all of Ukraine's nuclear fuel came from Russia, but now most does not. Some electricity infrastructure was destroyed in the Russo-Ukrainian War, but wind farms
