

**PIENAAR ENERGY (PTY) LTD**

# **Uninhabited Island Microgrid**

## Overview

---

A microgrid system is a localized energy grid that can operate independently or in conjunction with the main power grid. Aeroderivative gas turbines boasting unsurpassed flexibility. Hybrid renewable microgrids offer a promising solution, combining multiple clean energy sources with advanced storage technologies to provide reliable, sustainable power. By. Like many islands or extremely remote communities, Harbledown is home to a small First Nations community. These communities are far beyond the edge of the electric grid that serves so many of us.

### Curacao's Microgrid Shows How Small Island Nations Can

Curacao's state-owned utility, Aqualectra, set ambitious targets: increase renewable energy from 30% in 2024 to 50% in 2025 and 70% by 2027. Wärtsilä's role is to optimize the system
