Electricity sector in Uruguay

Overview Electricity supply and demand Service quality Responsibilities in the electricity sector History Notes External links

The electricity sector of Uruguay has traditionally been based on domestic hydropower along with thermal power plants, and reliant on imports from Argentina and Brazil at times of peak demand. Investments in renewable energy sources such as wind power and solar power over the preceding 10 years allowed the country to cover 98% of its electricity needs with renewable energy sources by 2025.
