

PIENAAR ENERGY (PTY) LTD

V3 Solar power generation

Overview

v3solar has developed a 'spin cell' capable of generating over 20 times more electricity than a static flat panel solar panel. using a combination of concentrating lenses and dynamic spin cycles, the project implements two-cone shaped lenses which are made up of hundreds of. We are excited to announce our newest warehouse has been established in Grand Prairie, which has allowed to service the Dallas-Fort Worth area. The energy industry is ripe for disruption. After decades of unpredictable rate hikes, absent innovation and poor reliability, customers are fed up with. That's not science fiction — that's the V3Solar Spin Cell, a next-gen solar innovation that's aiming to leave conventional flat panels in the dust. Shaped like a cone and wrapped in triangular photovoltaic (PV) cells, the V3Solar system introduces a radical new form and function to solar. Once in a while, you get a chance to think of 20 solar panels ignited at the same time and imagine how much energy output could be generated from a setup like that. The company believes that the Spin Cell could be a game-changer in its market.

V3 Solar power generation

Spinning Solar Panels Could Redefine Clean Energy: V3Solar's Cone

That's not science fiction -- that's the V3Solar Spin Cell, a next-gen solar innovation that's aiming to leave conventional flat panels in the dust. Shaped like a cone and wrapped in triangular ...

V3Solar's spinning cone-shaped solar cells generate 20 times more

V3Solar's rather elegant photovoltaic Spin Cell cones aim to address that, and their current prototype was recently third-party verified as capable of generating "over 20 times more ...

20x more energy than solar panels -- First spinning photovoltaic cone

V3Solar is a renewable energy company that developed a cone-shaped photovoltaic solar panel that generates 20 times more electricity than flat panels.

V3Solar's Spinning Photovoltaic Cones Capture Sunlight

While an "array" of V3's Spin Cell's can

occupy a very small space, relative to conventional flat panels, V3 has also conceived of a "Power Pole," to support even greater even solar power
