

PIENAAR ENERGY (PTY) LTD

Venlo greenhouse roof for photovoltaic panels

Overview

By incorporating solar panels in the roof on one side, intelligent use is made of the Venlo greenhouse design to produce green electricity. Not only is this type of greenhouse an excellent solution when growing shade loving crops, it is also ideal for your service area. In. We tailor our Lumenex™ Venlo greenhouse roof system to customer requirements and local standards, as well as to the geographical and climatic conditions of the project site. Generate your own. The Traditional Venlo Greenhouse utilizes dutch technology, while offering high levels of light transmission and a state-of-the-art roof ventilation system. The Venlo construction is storm safe.

Venlo greenhouse roof for photovoltaic panels

Generating sustainable energy with Solar Venlo® greenhouses

The Solar Venlo® greenhouse combines advanced greenhouse construction with solar energy. With solar panels integrated in or mounted on the greenhouse roof, you can generate energy without ...
