

PIENAAR ENERGY (PTY) LTD

Vientiane Solar System Power Station

Overview

Vientiane Solar PV Park 1 is a ground-mounted solar project. The project is expected to generate 337,000MWh electricity to offset 16,000t of carbon dioxide emissions (CO₂) a year. It is planned in Vientiane, Laos. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the permitting stage. The project construction is. To secure energy supply stability and sufficiency for serving the increasing energy demand of the society; and after a thoroughly consideration of the Ministry of Energy and Mines, resulting in a strong support from the Ministry of Energy and Mines, Electricity Du Laos and Electricite Du Laos. Together with the team and green energy experts from Asian Productivity Organization, they visited the Ministry of Energy and Mines of Laos, and built Laos' first floating solar system with TSB, the developer of the Vientiane solar power plant. Sun Rise E&T visited the Ministry of Energy and Mines. This project will install 14MW floating solar power system on three un-used water ponds in Vientiane. This power system has an ability to increase total output by suppressing negative effect caused by variation. There are 190 existing hydropower dams across the Mekong river basin in 2024, with an additional 19 projects under construction and 287 proposed dams. The team assisted Sun Rise E&T in confirming its participation in TSB's construction project of.
