

## PIENAAR ENERGY (PTY) LTD

# What are the specifications of polycrystalline photovoltaic panels

**Parallel** (Parallel operation up to 6 unit (only with battery connected))

**AC input wires**

**AC output wires**

## Overview

---

Polycrystalline Solar Panels are manufactured in 60, 72, and 96 cell configurations with a solar efficiency between 14-17%. 5" (163, 194 cm), widths of 39", 51. The surface of these solar cells resembles a mosaic which comes under polycrystalline solar panel specifications. These solar panels convert solar energy into power by absorbing it. Low voltage-temperature coefficient enhances high-temperature operation. Exceptional low-light performance and high sensitivity to light across the entire solar spectrum. 5-Year limited warranty on materials and workmanship. On average, you can expect to pay \$. 50 per panel, before installation and additional solar elements. The result: ingots with multiple silicon crystal grains, giving that recognizable blue-splashed look Unlike monocrystalline panels (single-crystal, high-efficiency, sleek. Solar Electric is a supplier of the highest quality European manufactured High Yield PV Modules which are in-house designed and manufactured in state of the art MCS Certified R&D and solar module manufacturing facilities.
