What fan is used for exhaust in the generator room

Overview

Exhaust fans are used to prevent heat buildup within the generator room, while supply fans are used to provide fresh air for combustion and efficient generator performance. Room size, space. This article addresses engine room ventilation considerations that apply to the successful installation, operation and maintenance of Caterpillar engines, generator sets, compressor units, and other packaged units. Ventilation is typically done through the use of an air inlet, air outlet/exhaust fan, and/or other ventilation openings.
