

PIENAAR ENERGY (PTY) LTD

What is the power of Georgia s energy storage batteries

Overview

Georgia Power will operate 80 megawatts of battery energy storage alone. Continued advancements in energy storage technology promise to have world-changing effects on the auto and energy industries as well as commercial and residential energy consumers. This capability promotes a steady and reliable supply of electricity, regardless of the variability in renewable energy. Georgia installs first battery storage system in Talbot County. Georgia is on track to deploy more than 1GW/4GWh of utility-scale storage by. Earlier this month, Georgia Power Company submitted its 2023 Integrated Resource Plan Update (2023 IRP Update) to the Georgia Public Service Commission, which includes an Application for Certification for four battery energy storage systems totaling 500 MW.
