

## **PIENAAR ENERGY (PTY) LTD**

# **What is the price of the San Diego grid-side energy storage cabinet factory**

## Overview

---

□ The estimated total cost of this contract is \$ 224. This Resolution approves San Diego Gas & Electric Company's ("SDG&E") request for approval of a utility-owned energy storage contract procured to address 2025. How much do storage systems cost in San Diego, CA in 2025?

As of December 2025, the average storage system cost in San Diego, CA is \$1031/kWh. Given a storage system size of 13 kWh, an average storage installation in San Diego, CA ranges in cost from \$11,392 to \$15,412, with the average gross price. The CPUC's Self-Generation Incentive Program (SGIP) offers rebates for installing energy storage technology at both residential and non-residential facilities. These storage technologies include battery storage systems that can function during a power outage. This expansion project will add 100 megawatts (MW) of energy storage capacity. By comprehensively applying the complementary advantages of energy storage, wind power, photovoltaics and diesel power generation, we can achieve optimal energy allocation, enhance regional energy self-sufficiency, reduce the construction and maintenance costs of traditional distribution systems.
