

PIENAAR ENERGY (PTY) LTD

What size is best for Yingli photovoltaic panels

Overview

In the case of Yingli solar panels, it is between 315W - 450W. The positive power rating for Yingli solar panels is listed at 0/+5 W, meaning that the panels will not produce less than their power rating but they might produce as much as 5 W more than their highest rated. Their conversion rate ranges from 19% to over 22% which puts Yingli panels among the most efficient ones up to date. This means that you'll need less space and fewer modules to build a powerful installation. The prices of Yingli Solar panels are on par with photovoltaics from other Chinese. Yingli does not offer many options, with only two mono PV modules to choose from, the YLM 120 half-cut cell all-black panel and the YLM 144 half-cut cell monofacial panel. Yingli Solar offers a range of high-efficiency photovoltaic modules. Its products have evolved over the years — while it started with full, polycrystalline modules, the company now offers only monocrystalline, half-cell solar panels. High efficiency PANDA modules are created from an innovative N-type cell technology.
