What to do if photovoltaic panels have a 20-year warranty

Overview

Traditionally, these warranties typically last 10-15 years, although it is becoming more common for premium panels to have 20 and 25 year product warranties. Like your home appliances and cars, solar panels come with warranties to shield you from unexpected financial burdens and the hassle of dealing with defective equipment. These warranties are a safety net - but they don't cover everything. And certain actions might even void your coverage. Equipment warranties can insulate you. Two Warranty Types Protect Different Areas: Product warranties (10-25 years) cover equipment defects and failures, while performance warranties (25 years) guarantee minimum power output of 90% at 10 years and 80-85% at 25 years.
