

## **PIENAAR ENERGY (PTY) LTD**

# **What to do if there is sheep manure hidden in the photovoltaic panels**

## Overview

---

Meta Description: Explore how sheep poop affects solar panel efficiency, why it's a growing concern for renewable energy, and actionable solutions to mitigate this issue. You know how they say "don't cry over spilled milk"?

Well, solar farm operators are now saying "don't sigh over. Research published in Applied Animal Behaviour Science found that sheep with access to solar panels spend more time grazing than those without [5]. Researchers believe that part of the reason is that the panels provide sheep with shade. In a separate report in 2018, it was found that the shelter of. In a groundbreaking study that combines renewable energy with traditional farming practices, researchers have observed remarkable changes in 1,700 sheep grazing amidst solar panels. Although sheep are the most common animals, other types of livestock are also used in some installations.

## Scientists studied 1,700 sheep roaming solar panels -- the results are

What's the secret? It turns out the panels provide natural shelter, shielding the animals from harsh sun and unpredictable weather. This leads to less stress - and as any sheep farmer will ...

## 1,700 sheep installed between solar panels, a surprising change

Sheep grazing between solar arrays showed no negative health impacts. Instead, researchers documented enhanced wool quality with increased fiber strength and growth rates.

Higher Anti-Rust Performance  
Lower Internal Impedance

## Sheep dung hidden in photovoltaic panels

Stung by high fuel costs and a labor squeeze, some clean energy companies are turning to an unlikely ally --flocks of sheep -- to keep theirsolar panels out of the shade.

## Claim: Sheep Produce Better Fleece When Grazed Under Solar Panels

According to a 2020 study, solar panels can leach dangerous heavy metal toxins, which could potentially contaminate the wool and meat produced by any sheep grazing under the panels.
