

PIENAAR ENERGY (PTY) LTD

What to do when the photovoltaic bracket is transported to the roof

Overview

Snippet paragraph: Safely transporting solar panels needs careful planning, strong packaging, and secure loading. Control temperature and humidity in transit. Here is how a good company packs it:

- First panels go on the pallet bottoms up and the last one is placed front side up.
- Corner protectors and foam pads across the frame are.

Photovoltaic systems mounted on flat roofs are particularly at risk if they are not adequately ballasted. If wind pressure and suction exceed the weight force, modules can slide, tip over, or even detach completely from the roof during storms. If the holes don't match up, it might be because of a small manufacturing. If your modules are damaged on arrival, notify the driver immediately, notify carrier and LONGi staff within 24 hours of delivery, and provide a record with detailed information within 48 hours of delivery. See claims and warranties for full details.

ENERGY STORAGE SYSTEM

Product Model
 HJ-ESS-215A(100KW/215KWh)
 HJ-ESS-115A(50KW 115KWh)

Dimensions
 1600*1280*2200mm
 1600*1200*2000mm

Rated Battery Capacity
 215KWH/115KWH

Battery Cooling Method
 Air Cooled/Liquid Cooled

How to Protect Solar Panels from Damage Transporting

Foam pads, bubble wrap, and even blankets - anything soft will do. Don't put anything on top of the panels, especially if you know there is a bumpy road ahead. It's a tough question, whether ...
